Release 3.23.2.0

## PRO Puck Integration

✚ New in this release
We are very happy to announce that our colored Pucks are now available for zactrack PRO!

You can now calibrate your PRO anchors and semi-automatically center and align your fixtures using our well-known Wizards, just like with zactrack SMART!

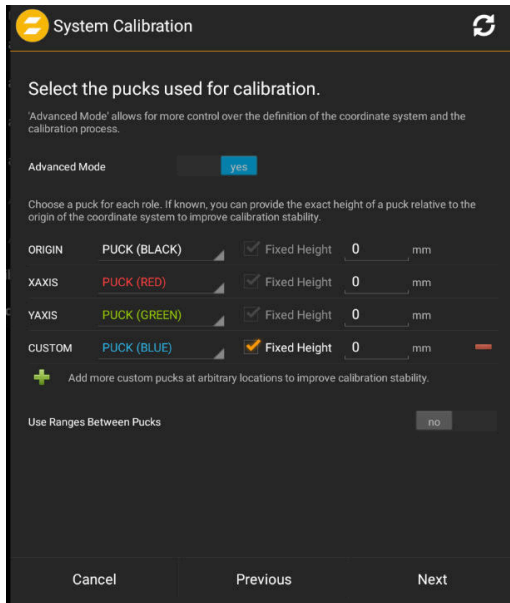

Set up your PRO Pucks within your system

1.   Go to ⁝ **Menu Dots** and tap on **System Settings**

2.   Define your 4 PRO Pucks according to their colours within the **Calibration Settings** at the bottom

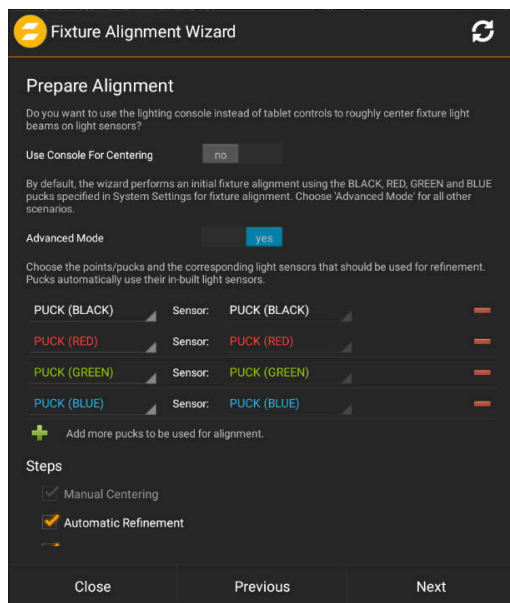

System Calibration

1.   Go to the **Points** section within the **Show Editor**

2.   Use the **System Calibration Wizard** together with our new zactrack PRO Pucks to calibrate your anchors

Fixture Alignment

1. Go to the **Fixture** section within the **Show Editor**

2. Use the **Fixture Alignment Wizard** together with our new zactrack PRO Pucks to semiautomatically centre and align your fixtures

NOTE
Please be aware that our new zactrack PRO Pucks require the zactrack PRO Tracking Server Upgrade V5. This effects all zactrack PRO servers purchased before September, 2022.

Minor Implementations & Fixes

Improved Import of GDTF files

Show the number of assigned fixtures in analyzer

Updated fixture library
